

Dear Calculus Students and Parents,

During the second semester, we will be reviewing in preparation for the AP BC Calculus exam on Tuesday, May 15, 2018. More than fifteen years ago, we began using materials from D&S Marketing Systems, Inc., and I feel that these materials are a significant factor in the success of our students. These booklets contain six practice AP exams, and the problems are the closest to the actual AP problems that I have seen (as compared to Barron's, Princeton Review, etc.). As the AP exam approaches, I would like to use three exams from this workbook for simulations of the AP exam, and the remaining three for in-class work and/or homework.

I would like to encourage **all** students to purchase a workbook for \$20.00. Students do have the option of **not** purchasing these workbooks, and have the school provide a copy, but in this case the student would not be allowed to mark in the workbook, nor would these workbooks be available outside of the classroom.

Please put a check mark in the appropriate blank below indicating your decision. If you decide to purchase the workbook, a check should be **attached with a paper clip** to this form. Checks should be made out to the **Fremont Union High School District** or **FUHSD**, and I will begin collecting these in class on January 18, 2018. The deadline for turning in these checks and forms will be February 2, 2018.

Sincerely,

Scott DeRuiter

_____ Yes, I would like to purchase the workbook.

_____ No, I do not wish to purchase the workbook.

_____ Name of Student (printed)

_____ Signature of Student

_____ Signature of Parent or Guardian
